NEW ZEALAND JOURNAL OF BOTANY

VOLUME 6 1968

CONTENTS, VOLUME 6

Page

Atkinson, I. A. E. An ecological reconnaissance of Coppermine Island, Hen and Chickens Group 285

Bajaj, Y. P. S. and **Dionne, L. A.** The continuous culture of excised potato roots 386
Barclay, P. C. *See* **Williams, Elizabeth** 405
Baylis, G. T. S. Day length and flowering in the *Solanum aviculare* group 221
Beuzenburg, E. J. *See* **Hair, J. B.** 19
Brougham, R. W. *See* **Scott, D.** 427
Bussell, W. T. The growth of some New Zealand trees
1. Growth in natural conditions 63
2. Photoperiod and temperature 76
Butcher, J. A. The causes of sapstain in red beech 376

Cameron, R. J. The leaching of auxin from air-layers 237
Clarke, C. M. H. Flowering periods of alpine plants at Cupola Basin, Nelson, New Zealand 205
Connor, H. E. Interspecific hybrids in hexaploid New Zealand *Festuca* 295
Corrigenda 402

Dawson, J. W. An analysis of flowers and fruits in New Zealand *Metrosideros* 43
Dawson, J. W. New Zealand Umbelliferae. A leaf comparison of *Aciphylla* and *Anisotome* 450
Dawson, J. W. The vegetative buds of the New Zealand species of *Metrosideros* 240
Dickinson, G. H. *See* **Hughes, S. J.** 106
Dionne, L. A. *See* **Bajaj, Y. P. S.** 386
Drury, D. G. A clarification of generic limits of *Olearia* and *Pleurophyllum* 459

Edgar, E. Contrasting growth habits in New Zealand species of *Gahnia* 115
Edgar, Elizabeth. The New Zealand species of *Leptocarpus* (Restionaceae) 467
Elliott, Ruth F. Morphological variation in New Zealand Saprolegniaceae 2. *Saprolegnia terrestris* Cookson and *S. australis* sp. nov. 94

Flentje, N. T. *See* **Taylor, J. B.** 417
Flint, E. A. *See* **Kol, E.** 249
Franklin, D. A. Biological flora of New Zealand—3. *Dacrydium cupressinum* Lamb. (Podocarpaceae) Rimu 493

Galloway, D. J. A new variety of *Usnea* (*Neuropogon*) *ciliata* (Nyl.) DR., in southern New Zealand 470
Galloway, D. J. The lichens of Stewart Island—2. Port Pegasus 309
Godley E. J. The fruit of *Pittosporum pimeleoides* 118

Hair, J. B. Contributions to a chromosome atlas of the New Zealand flora—12 *Poa* (Gramineae) 267
Hair, J. B. The chromosomes of the Cupressaceae—1 Tetraclineae and Actinostrobeae (Callitroideae) 277
Hair, J. B. and **Beuzenberg, E. J.** Contributions to a chromosome atlas of the New Zealand flora—11. Miscellaneous families 19
Hair, J. B. and **Wright, G. M.** Analysis of a compactoid wheat 262
Hicks, D. H. and **Mitchell, K. J.** Flowering in pasture grasses—1. Interactions of day length and temperature on inflorescence emergence for *Festuca arundinacea* Schreb. variety Manade 86

Contents

Hughes, S. J. and **Dickinson, G. H.** New Zealand fungi—11 *Gliomastix* Guéguen 106

Hughes, S. J. and **Kendrick, W. B.** New Zealand fungi—12 *Menispora, Conidaea, Menisporopsis* 323

Index 525

Kendrick, W. B. *See* **Hughes, S. J.** 323

Kol, E. A note on red snow from New Zealand 243

Kol, E. and **Flint, E. A.** Algae in green ice from the Balleny Islands, Antarctica 249

Lammerink, J. Genetic variability in commencement of flowering in *Medicago lupulina* L. in the South Island of New Zealand 33

McIntyre, D. J. Further new pollen species from New Zealand Tertiary and uppermost Cretaceous deposits 177

Macmillan, B. H. A method of mounting herbarium specimens 514

McNabb, R. F. R. The Boletaceae of New Zealand 137

Menalda, P. H. *See* **Scott, D.** 427

Mitchell, K. J. *See* **Hicks, D. H.** 86

Moore, L. B. Taxonomic notes on New Zealand monocotyledons 473

Palmer, T. P. Inheritance of split cotyledons in swede-turnips (*Brassica napus*) 129

Patel, R. N. Wood anatomy of Cupressaceae and Araucariaceae indigenous to New Zealand 9

Patel, R. N. Wood anatomy of Podocarpaceae indigenous to New Zealand—3. *Phyllocladus* 3

Philipson, W. R. The abaxial stipules of *Plagianthus divaricatus* J. R. and G. Forst. 518

Powell, Richard H. Harmful plant species entering New Zealand 395

Scott, D., Menalda, P. H., and **Brougham, R. W.** Spectral analysis of radiation transmitted and reflected by different vegetations 427

Sheridan, J. E. Conditions for germination of pycnidiospores of *Septoria apiicola* Speg. 315

Taylor, J. B. and **Flentje, N. T.** Infection, recovery from infection, and resistance of apricot trees to *Verticillium albo-atrum* 417

Wardle, P. A floristic list for the Hokitika catchment 523

Wardle, P. Ecological survey of New Zealand's indigenous forests, Type Map Series No. 2 245

Wardle, P. Evidence for an indigenous pre-Quaternary element in the mountain flora of New Zealand 120

Wardle, P. *Pseudopanax macintyrei* 522

Wardle, P. The taxonomy and distribution of the stipulate species of *Pseudopanax* in New Zealand 226

Williams, W. M. Effects of two levels of nitrate on cell-division rates in roots of wheat seedlings 25

Williams, Elizabeth and **Barclay, P. C,** The effects of B-chromosomes on vigour and fertility in *Dactylis* hybrids 405

Wilson, Graeme J. Palynology of some Lower Tertiary coal measures in the Waihao district, South Canterbury, New Zealand 56

Wright, G. M. *See* **Hair, J. B.** 262

New Zealand Journal of

BOTANY

1127-25 JUL 6 1968 OF ILL. LIB. CHICAGO CIRCLE

IN THIS ISSUE

		Page
ANATOMY	Wood anatomy of Podocarpaceae indigenous to New Zealand — 3. *Phyllocladus* **R. N. Patel**	3
	Wood anatomy of Cupressaceae and Araucariaceae indigenous to New Zealand **R. N. Patel**	9
CYTOLOGY	Contributions to a chromosome atlas of the New Zealand flora — 11. Miscellaneous families **J. B. Hair** and **E. J. Beuzenberg**	19
	Effects of two levels of nitrate on cell-division rates in roots of wheat seedlings **W. M. Williams**	25
GENETICS	Genetic variability in commencement of flowering in *Medicago lupulina* L. in the South Island of New Zealand **J. Lammerink**	33
MORPHOLOGY	An analysis of flowers and fruits in New Zealand *Metrosideros* **J. W. Dawson**	43
PALYNOLOGY	Palynology of some Lower Tertiary coal measures in the Waihao district, South Canterbury, New Zealand **Graeme J. Wilson**	56
PHYSIOLOGY	The growth of some New Zealand trees — 1. Growth in natural conditions **W. T. Bussell**	63
	The growth of some New Zealand trees — 2. Photoperiod and temperature **W. T. Bussell**	76
	Flowering in pasture grasses — 1. Interactions of day length and temperature on inflorescence emergence for *Festuca arundinacea* Schreb. variety Manade **D. H. Hicks** and **K. J. Mitchell**	86
TAXONOMY	Morphological variation in New Zealand Saprolegniaceae 2 **Ruth F. Elliott**	94
	New Zealand Fungi — 11. *Gliomastix* Guéguen **S. J. Hughes** and **G. H. Dickinson**	106
NOTES AND COMMENTS	Contrasting growth habits in New Zealand species of *Gahnia* **E. Edgar**	115
	The fruit of *Pittosporum pimeleoides* **E. J. Godley**	118
	Evidence for an indigenous pre-Quaternary element in the mountain flora of New Zealand **P. Wardle**	120

Volume 6, No. 1
MARCH 1968

NOTICE TO CONTRIBUTORS

Authors are advised that papers should be submitted to any member of the Editorial Board:

Dr E. J. Godley (Chairman),
Botany Division, D.S.I.R., Private Bag, Christchurch;

Miss A. P. Wylie,
Botany Department, University of Otago, Box 56, Dunedin;

Dr. R. F. R. McNabb,
Lincoln College, Canterbury;

Professor R. G. Thomas,
Botany Department, Massey University of Manawatu, Palmerston North.

Papers published, or offered for publication, elsewhere are not acceptable. Nevertheless, publication elsewhere of an abstract or of an extended summary does not preclude publication in full in this journal.

Typescript

The original and one carbon copy are required, on one side only of foolscap paper, double spaced, with a left-hand margin of at least 1½ in. Reasonably heavy good-quality paper should be used; flimsy paper delays the machine operator and consequently increases the cost of printing.

A brief summary suitable for reproduction by abstracting journals is required at the beginning of the paper.

All matter to be printed in italic type (e.g., generic and specific names) must be underlined.

In taxonomic papers names of herbaria should be abbreviated in accordance with the "Index Herbariorum, Part 1, The Herbaria of the World", 5th ed. 1965. A clear distinction must be made between the citation of any figure relating to a previous description and any figure in the present paper.

Tables

Tabular matter costs more to print than letterpress and should therefore be kept to a mimimum, bearing in mind, however, that a well planned table can take the place of a much greater area of letterpress.

Wherever possible, tables should be arranged to fit upright on the page; they should be numbered in arabic numerals. Units of measurement should be placed in parentheses at the head of the column, not in the body of the table. Descriptive notes should be kept to a minimum, and abbreviations used wherever possible. For abbreviations, etc., the usage followed is that of British Standard 1991, Letter Symbols, Signs, and Abbreviations. Part 1. General.

Figures

Illustrations should be in duplicate, but the second copy need not be of publication standard. They are to be numbered consecutively in arabic numerals, regardless of whether they are half-tones (photographs) or line blocks (graphs, etc.). Only such figures as are essential to elucidate the text can be published.

The author's name, the title of the paper (abbreviated), and the figure number should be written lightly in soft pencil on the back of each figure.

Photographic prints should be on glossy paper, and may be the same size as or larger than the printed picture. Components of a composite figure should be firmly mounted on white card and lettered as required A, B, C, etc.

Graphs should preferably be drawn about twice the final size. Great care should be taken to ensure that all detail, especially lettering, is of such a size as to be clearly legible when reduced to final size. The author may leave lettering to be added in this office; his requirements should not be pencilled on the drawing to be lettered, but shown on the second copy only.

If the scale is important, it should be shown on the figure; if this is impossible, magnification or reduction may be stated in the caption, taking into account the printing reduction.

Captions for all figures should be typed together at the end of the paper.

(Continued inside back cover)
